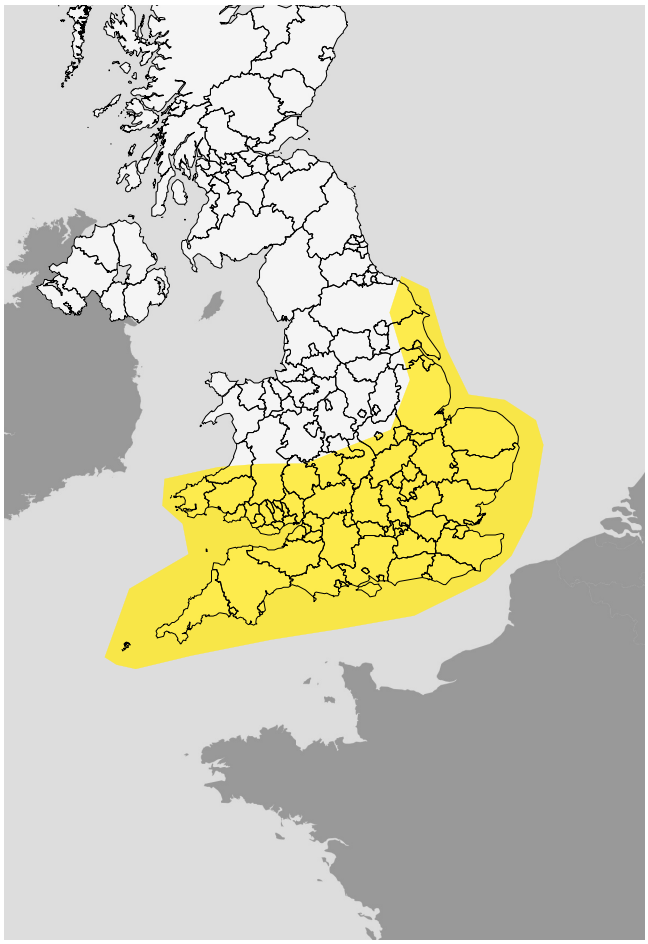
Yellow warning
Wind

Between
09:00 Sun 23 Sep 2018 and
23:59 Sun 23 Sep 2018



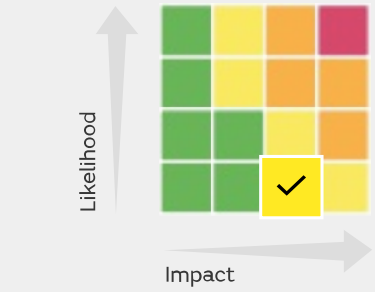
Potential for another very windy spell across parts of the UK through Sunday

What to expect

- There is a small chance of injuries and danger to life from flying debris
- There is a slight chance of some damage to buildings, such as tiles blown from roofs or through falling trees and branches
- There is a small chance of longer journey times or cancellations as road, rail, air and ferry services are affected
- There is a slight chance that power cuts may occur, with the potential to affect other services, such as mobile phone coverage
- There is a small chance that injuries and danger to life could occur from large waves and beach material being thrown onto sea fronts, coastal roads and properties

Further details

During Sunday there is the potential for a spell of strong winds and a swathe of persistent heavy rain to affect southern Britain. The exact timing and intensity of the associated weather system still remains uncertain, but there is potential for strong winds to develop across the west early on Sunday, strengthening further as the system tracks eastwards. Should these occur parts of East Anglia and South East England might also suffer some coastal impacts from large waves, particularly at times of high tide. Winds should ease from the west later on Sunday.



Very low likelihood of medium impacts
